ViewSonic®
See the difference™ 

Advanced Multi-point touch capability for group interaction

With multi point simultaneous touch technology this large-panel display encourages group interaction. Great for interesting group activities, two or three users can simultaneously write or draw on the display's surface at the same time! And its superior touch report rate provides a smoother user touch experience for both educational and corporate applications.

ViewBoard software provides tools for effective presentation

We've pre-installed our simple and easy-to-use ViewBoard software on all of our ViewBoard series. With various tool bar options that allow you to write, draw, save and share, the presenters can better highlight the contents. It also features screen recording, magnifier and spotlight features that make office presentations, in-classroom and distance education learning more productive, interactive and efficient.

ViewBoard: Optimized Windows 8 interactive solution

Edge Boarder design improves Windows 8 touch experience

With the unique edge border design that redefines the relationship between the bezel and panel, in particular operating under Windows 8, there are no more dead angles. This design provides an improved user touch experience, and with an easy pull out charm bar, the presenters can operate all Windows 8 functions more efficiently and productively.

Windows®8 operating system for a better interactive experience

The Windows 8 and MS Office software make it great for office and school use for any sort of presentations. The built-in browser enables the presenters to show content directly from the Internet. Windows 8 creates great interactive experience that helps to share and upload data, connect and collaborate, and even create presentations, which largely improve overall efficiency and productivity.

ViewSonic®
See the difference™ 

A wider range of accessible application for education and business

Presenters now have more options and Windows® 8 apps to choose from. Now there is greater access to various education applications, including storytelling, math-related and language testing programs and more. Your students or audience members will surely benefit from the productivity and interactivity that this offers.

Packing powerful intel processors

Utilizing powerful Intel® processors, ViewSonic's ViewBoard series provides the computing power needed for multimedia applications. This means smooth, high-speed video performance, high definition graphic, gaming capability and more. It's great for multi-tasking, letting the presenters can open multiple screens and applications without slowing the system down. Increase class efficiency and productivity even more with ViewSonic's ViewBoard series.

HDMI
HIGH DEFINITION MULTIMEDIA INTERFACE

Versatile input selection for flexible connectivity

Benefit from the improved device connectivity of our ViewBoard series versatile selection of inputs to easily connect and use all the digital equipment in meeting rooms or classrooms. With HDMI, connect to high-definition content sources, and USB, DVI and VGA ports, and have the freedom to focus on the work that is most important.

Large-panel display accessories for improved usability and mobility

Students and teachers can use the provided stylus, or their fingers to simultaneously write on our large-panel display. Location is also a key consideration when installing your Smart Whiteboard. That's why it can be wall mounted for a solid and safe user touch experience. Also, we offer a trolley mount that offers you the flexibility to move your display for a better viewing angle.

Protective Rounded-Corner Design

Providing a safer learning environment for active students is also an important consideration. That's why ViewSonic's ViewBoard series utilizes a rounded-corner design to help prevent young students from getting injured within their classroom environment.

Tough Anti-Scratch, Anti-Glare Cover

ViewSonic's ViewBoard series is made even more durable by a layer of 7H-hardness tempered glass
