

ViewSonic

ViewPad 10 and ViewPad 10 3G

The best of both worlds

10" tablet that offers dual operating systems, Windows Home Premium and Android within same high speed device

Google Android or Windows 7 Home Premium

Users have the choice of an optimised mobile device experience using the innovative Google Android OS for browsing and simple applications, or the familiar Windows 7 environment for VPN, Outlook and other high end requirements.

High definition capacitive touch-screen display

The sensitive touchscreen display opens a world of options with both Windows 7 Home Premium and Android optimised to take advantage.

High speed processor and lots of memory

The high speed Intel 1.66GHz processor, integrated 1GB and 16GB SSD HDD provide a high quality experience that allows users to use Windows the way they like, or Android for an optimised mobile device experience.

The connectivity of a PC in a tablet

With full 3G (3G model only) and fully wireless-enabled, USB and even a SVGA display port, the ViewPad 10 offers a full PC experience when required, inside the lightweight and stylish design of a tablet.
